

EA Health Virtual On Call®

Tele-Cardiology

*EA Health, the national leader in Call Coverage solutions, in partnership with Aretaeus Telemedicine (ATI), proudly presents **EA Health Virtual On Call (VOC®)**, a telemedicine solution designed to elevate patient care and streamline hospital operations.*

Since 1992, EA Health has been designing, implementing, and administering hospital On Call Compensation Programs to help secure specialty physician call panel participation and improve patient access to emergent specialty care.

Founded in 2007, Aretaeus (ATI) has been transforming the delivery of healthcare through cost-effective telemedicine solutions.

EA Health VOC Value Proposition:

- **24/7 Access:** Tele-cardiology services provided by board-certified cardiologists.
- **Cost-Effective:** Substantially reduce costs associated with on-site specialists.
- **Improved Patient Outcomes:** Expedite decision-making care with real-time consultations, reducing unnecessary patient transfers and strain on your hospital.

Why EA Health VOC is a Perfect Fit?

- Access to Tele-Experts:
Our collaboration with ATI gives your facility access to a national panel of experienced tele-cardiologists, available 24/7 for rapid EKG reads, STEMI consults, and inpatient rounding.
- Better Patient Outcomes:
Immediate access to cardiology input improves triage and treatment timelines, ensuring timely interventions that can be life-saving in acute cardiac events.

- Seamless Integration:
Aretaeus's "Round-&-Respond" telemedicine, along with EA Health's infrastructure, seamlessly integrates with your existing processes, minimizing disruption and maximizing efficiency. Our experience and expertise ensures a smooth transition, allowing your hospital to focus on what matters most—patient care.
- Cost-Effective Solution:
By leveraging telemedicine, hospitals can reduce costs associated with on-site specialists, resulting in significant savings. EA Health Virtual On Call provides high-quality care without the hefty price tag.

How It Works:

1. Connect: Easily connect with our tele-cardiologists through our secure, HIPAA-compliant platform.
2. Round: Patients are seen daily throughout their hospitalizations.
3. Consult: On-demand collaboration on patient cases, allowing for timely and expert-driven decision-making.

Elevate your hospital's capabilities with the support of experienced tele-specialists.
